

The Issaquah Alps Trails Club is well on its way. Our weeknight hikes have been especially well attended and our Saturday trips continue to be very popular. Our membership is building quickly and new people are continually becoming involved.

This newsletter describes 8 hikes planned for July and August and includes a membership application if you are not yet a member, or wish to pass it on to a friend. We have also included a form to list the names and addresses of people you know who might be interested in receiving a complimentary copy of our newsletter.

This will be a nice 6-7 mile trip on Bill Longwell's Tiger Mountain Trail. People are encouraged to bring a pair of oruners, loppers, or a Swede saw for we hope to clear about 2 miles of the trail. This will be our first trail maintenance trip, but it will also be one of the nicer hikes of the year as well. This will provide you with a good chance to learn more about Tiger and make it easier for you and others to travel around this wilderness and reach the many beautiful view points on Tiger in the future. 600 feet elevation gain.

Jordan Creek is also called the North Fork of Issaquah Creek and is to the north of the gravel mining operations northeast of Issaquah. The hike is not difficult but be prepared to cross the creek several times.

This trip will begin at May Valley School. There will be two possible trips. The first is a very easy hike to, up, and across the beautiful Licorice Fern Wall. This was a very popular hike in June and a spot everyone should "discover". For those who are more ambitious there will be a chance to venture up on to Cougar and see Doughty Falls, View Creek, and Far Country Creek. The Licorice Fern part totals less than a mile, but the longer hike totals about three miles and is not all on a trail. Total elevation gain for longer hike is 700 feet.
